

Over 100 Years of Experience

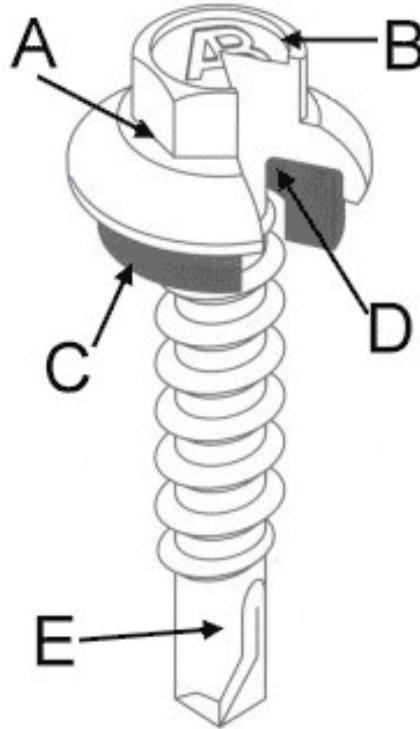

Flat Top Self-Sealing Fasteners

Ideal for roof and wall applications.

- A - Flat on top stabilizes socket during installation
- B - Higher hex provides positive socket engagement
- C - EPDM sealant assures waterproof seal even under harsh conditions
- D - Special undercut entraps sealant even when driven at angles
- E - Standard Oxyseal II™ long-life coating for added corrosion protection on carbon steel fasteners

Flat-Top fasteners combine under-cut hex washer heads with EPDM cut-tubular sealing washers. They are a superior and cost-effective alternative to standard fasteners with metal back washers.

One-piece design eliminates damage to painted washer surface and eliminates dissimilar metal washer materials
